INTELLIGENT ENGINEERING, SMART DESIGN

The latest asepsis regulations now in a beautiful new green package

The advanced, new design of our Perfect Fit Sterilization Center effectively fights infection while being environmentally responsible. This brand new station takes into account the latest North American asepsis regulations to meet or exceed all current standards.

Our Sterilization Center is remarkable for its 'green' construction. It contains no urea formaldehyde resins and is built with water-based adhesives, making it LEED compliant. The 'Leadership in Energy & Environmental Design' certification means your practice can also benefit.

- Built-in barriers separate functional sections
- Custom integration of automated cleaning devices
- Built around 'easy-to-use' and compatible with 'Cassettes'
- Solid shelves
- Built-in cold soak
