

# OUR WORK

## HONDA

**POWER, PURE AND SIMPLE**

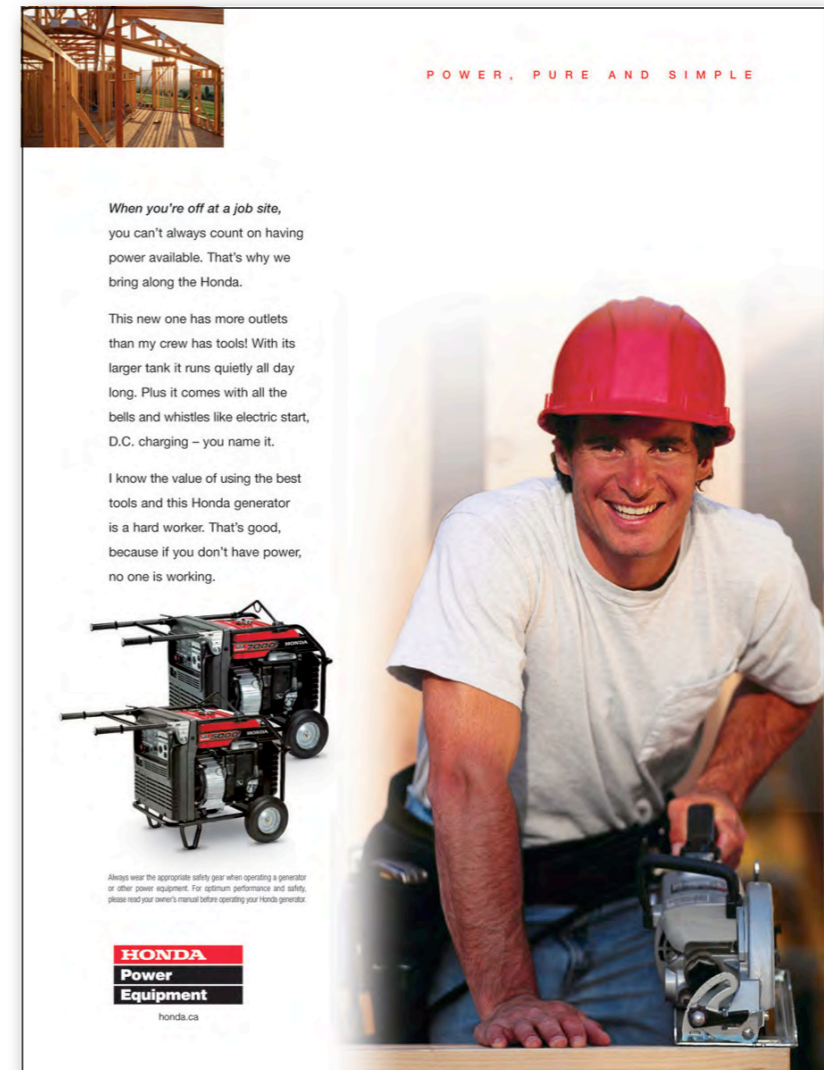

*Summer at the cottage is the best time we spend together. But you can always count on a wild summer storm to knock out power for a while.*

*That's why we got the back-up generator. Mainly for the dog's sake, and the kids feel more secure too.*

*Now we know that food in the fridge won't spoil, the computer still runs and dinner will be on time. Thanks Honda.*

**POWER, PURE AND SIMPLE**

*When you're off at a job site, you can't always count on having power available. That's why we bring along the Honda.*

*This new one has more outlets than my crew has tools! With its larger tank it runs quietly all day long. Plus it comes with all the bells and whistles like electric start, D.C. charging – you name it.*

*I know the value of using the best tools and this Honda generator is a hard worker. That's good, because if you don't have power, no one is working.*

Always wear the appropriate safety gear when operating a generator or other power equipment. For optimum performance and safety, please read your owner's manual before operating your Honda generator.
