

OUR WORK

REDMOND/WILLIAMS

TOO HOT OR COLD?

We service all brands of geothermal heat pumps

Our geothermal heat pump service program

[ABC Heating and Cooling] has been a proud member of the [Sudbury] area community for more than [10] years. We take on all kinds of heating and cooling challenges, but one thing we know for sure: A program of **regular maintenance** saves money and keeps you comfortable all the time. Servicing your heat pump starts with an explanation of each of the inspections included in our service program, including:

- Check and clean cabinet, evaporator coil and condensate drain
- Check compressor, blower and auxiliary heat amperage and voltage
- Check water and air temperatures
- Inspect all electrical connections
- Inspect duct

We also sell BOSCH

Our heat pump systems are the most energy and cost efficient systems on the market - and therefore the greenest technology for both heating and cooling applications. Bosch has an enviable reputation for outstanding engineering and high quality components. Our heat pumps are no exception, offering an industry-leading 10 year parts and labour warranty.

If you're thinking it's time to replace your present heat pump, you really can't do better than Bosch.
